

Snoqualmie Watershed

EDUCATION PROGRAMS

Pond Dipping (Grades 7-9)

Have a Retention Pond on or near your school grounds? Did you know that these ponds are teeming with life and help clean our water? Would your class like to join a naturalist to pike about the pond and use scientific methods to learn how important these mini human-built wetlands are to our water system? Students will observe freshwater invertebrates and test for indicator species.

River Connection (Grades 6-12)

Rivers are the life-blood of our watersheds. Students will learn what makes a healthy riparian ecosystem and explore some of the specifics of the Snoqualmie River system.

River Connection Field Trip (Grades 6-12)

Students will gather on the banks of the Snoqualmie River at Tolt MacDonald Park and work with a naturalist to test the river water quality for oxygen, pH, temperature, and water quality.

Water Supply (Grades 6-12)

Do you know where your water comes from? Discover the origins of your local water and the path it takes to your faucet. Students will explore the human and natural factors that affect our water supply and how to protect it.

Water Conservation (Grades 6-12)

Did you know the Puget Sound area gets a lot less rain than Miami? Join us for an interactive lesson that will explore what we can do to conserve our surface and groundwater.

Groundwater (Grades 7-9)

Did you know how much of our drinking water comes from groundwater? Students will explore how groundwater moves within our larger water system using a tabletop groundwater model. Students will explore what we can do to protect our water resources.

How to register: Choose your program and then visit <http://www.naturevision.org/program-registration/>. Under cost, write "KCD" for the name of the sponsor.

Scheduling considerations: Each school may register for up to 5 programs, distributed among teachers by the school. Pre-registration is required.

Who are we: Nature Vision is an award winning non-profit organization formed in 2003. Our mission is to foster appreciation and stewardship of our environment through integration of school, community, and nature education. These programs are delivered through funding provided by a King Conservation District Snoqualmie Watershed Forum grant. Contact us at 425-836-2697 or info@naturevision.org for more information or questions.
